

Homework: HTML5 Forms

This document defines homework assignments from the [“Web Fundamentals \(HTML & CSS\)” Course @ SoftUni](#). Please submit as homework a single **zip / 7z** archive holding the source code of all below described problems.

Problem 1. Simple Form

Create a HTML form like the image below (100% accuracy is not required). Put appropriate validation and placeholders.

The form is titled "Enter the system" and includes a sub-header: "It is necessary to login in Your account in order to sign in for a course." It is divided into two main sections: "ARE YOU NEW? REGISTER" and "ALREADY A STUDENT? LOGIN".

ARE YOU NEW? REGISTER

- User name
- Email
- Password
- Confirm Password
- Register button

ALREADY A STUDENT? LOGIN

- User name
- Password
- Remember me? checkbox
- Login button
- [Forgot Password](#) link

Problem 2. Flight Order

Create a HTML page like the image below (100% accuracy is not required).

The form is titled "FLIGHT ORDER" and is designed for flight booking. It includes the following fields and options:

- From:** enter a city (dropdown)
- To:** enter a city (dropdown)
- ☐ Prefer directs
- Departure Date:** 09.06.2014
- Time Interval:** 00:20 to 05:00
- Return Date:** 13.06.2014
- Time Interval:** 16:00 to 22:00
- Class Selection:** 12+, 2-12, 0-2 (radio buttons)
- Choose class:** Economy (dropdown)
- Search** button

Problem 3. WordPress Theme

Create a HTML page like the image below (100% accuracy is not required).

The interface shows the WordPress logo and the text "WORDPRESS". Below it, there is a section for uploading a theme:

Upload a theme No file chosen

Or search in wordpress 

Problem 4. Fakebook Register Form

Create a HTML page like the image below (100% accuracy is not required). Make the fields on the right required. Use field validation for email and phone number. Set some tab indexes. Use labels where possible.

fakebook®

Registration

It is safe and it will always be!

None-Important Information

Birthday

☐ Female ☐ Male ☐ Other

Important Information *required

Door Color

More Personal Information

Clear Form

Register

Problem 5. Laptop Choice

Create a HTML page like the image below (100% accuracy is not required). You don't need to optimize the sliders for all browsers. Each group of elements, marked in red, must be a button that opens a link by choice. *The red rectangle is not a part of the assignment.*
